

# Compare Our Maintenance and Protection Plans

You have thousands of dollars invested in your heating and cooling equipment. The best way to protect that investment is with regular maintenance. Like your car, if it is well maintained it will be safer, run better, use less energy and last longer. A Comfort Plus ClimateCare "WeCare" Maintenance or Protection plan includes everything that can be done to restore your heating and cooling system to its best possible condition. Annual maintenance is required to keep most manufacturers' warranties valid, showing you are doing your due diligence in maintaining the equipment that you rely on to keep you comfortable year round. Warranty can become null and void if annual maintenance is not being completed, just like with a car. A small problem that is not caught, can possibly cause a bigger problem down the road. Our plans meet or exceed all manufacturers' warranties.
